

We all want to recycle, but could you be recycling more?

Huntingdonshire residents can recycle a wide range of materials via the kerbside collections including the most common items; glass, paper/cardboard, cans/tins and plastic bottles. But did you know we can also recycle:

-  Aerosols
-  Plastic pots tubs and trays, including black trays
-  Clean foil
-  Drink cartons
-  Stretchy, flexible plastics, like bread bags

Do not forget, it needs to be clean, so as not to contaminate other materials when being collected. This can be done at the end of the washing up; it does not need to be sparkling.

If you create more recycling than your bin can hold, we do take excess recycling as long as placed out in clear or transparent sacks, so our crew can see that it is recycling.

We also provide an organic collection, where you can dispose of food waste (including cooked food and bones/shells), shredded paper and untreated wood, as well as garden waste. This can all be added loose into the bin or wrapped in paper.

Shredded paper needs to go in the green garden collection as the paper is too small and degrades the quality of the paper recycling. It can also get caught up in the machinery at the materials recovery facility.

If you are still in doubt, please get in touch.
